

HELIOS (2000 Series)

The ultimate PVC Casement Window

Nothing was overlooked for the Helios window to provide maximum comfort and energy efficiency.

- Rigid PVC multi-chamber frame 114.3 MM (4 1/2") thermo-fusion welded with incorporated "J" return for jamb extension for easy and flawless installation;
- Sashes located in the insulated part of wall for enhanced comfort;
- Rigid PVC welded sashes with sealed double-glazed units 22.2 MM (7/8") finished thickness. Sashes swing out easily, thanks to a standard double-action mechanism that allows a 90-degree opening to facilitate cleaning from inside the house;
- Triple weather-strips for maximum air tightness;
- Non-conductive spacer;
- Interior glazing beads for better appeal (models with integrated grills or no grills);
- Interior screen with exclusive trim for superior protection against bugs.

Improved Security

All Helios models offer improved security device against forced entry with the multipoint locking system activated by a single lifetime guaranteed lever.

Interior glazing beads
(for superior aesthetics
and exclusivity)
