

AMALGAME (Hybrid) PVC and Aluminium Combined in the Same Window!

With its Amalgame windows, Vimat Windows & Doors has reunited the best of both worlds. A rigid PVC multi-chamber thermo-fusion welded frame, incorporating aluminium extrusions on the exterior side. A brilliant idea that provides rigidity and superior thermal efficiency, thanks to the non-conductive PVC properties.

Because it combines two of the most popular window materials, the Amalgame window will suit any architectural applications.

Our Hybrid Sliding Window

Our Hybrid Casement Window

- A rigid PVC thermo-fusion welded frame, 114.3 MM (4 1/2") with an aluminium extruded extension for even better sturdiness;
- A rigid PVC welded sash – with aluminium extrusion – located in the insulated part of the wall for increased comfort;
- Sashes swing out without effort, thanks to a double action mechanism that provides a 90-degree opening for easy cleaning from inside the house;
- Modular assembly ensuring rigidity and sturdiness;
- Triple weather stripping for maximum water resistance;
- Non-conductive spacer;
- Multipoint locking device activated by a single lever for easy use;
- Interior screen with exclusive trim to provide increased protection from bugs.
