Hybrid

About US

VIMAT Doors & Windows offers you the widest selection of products in all price ranges

OUR REPUTATION

Vimat first opened its doors in 1977. Today, we are among Canada's **leading manufacturers and distributors** of windows and doors with 9 branches located in Quebec, Ontario and now in Calgary. At Vimat, customer service is more than a priority, it's a reality since we are able to meticulously control every aspect of **product quality and service**: from manufacturing to sale and installation! That's why we can say that Vimat is a highly responsible, well managed company totally committed to earning your business and recommendation.

THE POWER OF THE GROUP

Vimat is owned by the Atis Group, a **Canadian leader** in the manufacturing and installation of doors and windows. In Atis factories, over 2 000 dedicated employees provide the same high **quality and performance** that is demanded by Vimat, thanks to highly **sophisticated** equipment in the hands of the best engineers, designers and technicians in the industry.

INSTALLATION

Vimat's turnkey installation service is provided by **certified professionals** known to be extremely meticulous and precise. And since your long term satisfaction is our main priority, our window installations are guaranteed for a period of **10 years**.

ENERGY STAR PRODUCTS

All Vimat products displaying the Energy Star seal are approved by Hydro-Québec's "Energy Wise" program. In addition, they come with one of **the industry's best warranties** to ensure that your investment is one of the wisest and most durable decisions possible.

PVC Products

Let Your Dreams
be Our Command

PVC windows and patio doors from Vimat:
now THAT makes sense!

Whether you're looking to increase the comfort level of your home while increasing its **energy efficiency**, or to simply give your home a fresh new look and appeal, you have every reason to opt for PVC windows made by Vimat. What makes PVC such an ideal material is its **excellent water and air tightness** combined with its non heat conducting properties and the fact it requires only **minor maintenance**. Our PVC windows are **made in Canada**, so you can count on them to be extra solid, durable and efficient. You can also rest assured that they have what it takes to withstand our harsh winters.

Set your sights on our Energy Star products,
as they will greatly increase your home's energy efficiency!

5

HYBRID Products

A New Age of Possibilities

HYBRID WINDOWS AND DOORS

Vimat offers you **the best of both worlds** by combining the thermal performance of PVC and the durability of aluminum. Designed with a rigid PVC frame incorporating aluminum extrusions on their exterior side, hybrid products give you the benefit of **higher rigidity and superior thermal efficiency** all wrapped up in a beautiful design.

Because colour lasts much longer on aluminum windows, hybrid windows are the perfect choice if you should opt for coloured windows. These windows are also capable of weathering harsh conditions thanks to a high-performance paint applied in our plant. Available in a range of standard and customized colours!

Set your sights on our Energy Star products,
as they will greatly increase your home's energy efficiency!

CASEMENT Windows

The Helios window offers the perfect mix of solidity, comfort and beauty.

These windows are designed for very **easy maintenance** thanks to a special sash mechanism opening to a 90° angle toward the centre that makes exterior window cleaning a real breeze. All Helios models offer added security against intrusions thanks to their multipoint locking mechanism activated by a unique lever with a **lifelong warranty**. For greater aesthetics, the Helios window is also fitted with a retractable handle. You can add one or more decorative crossbars to give it a vertical sliding or ancestral look.

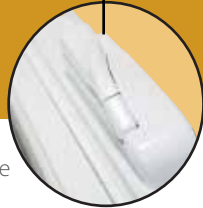

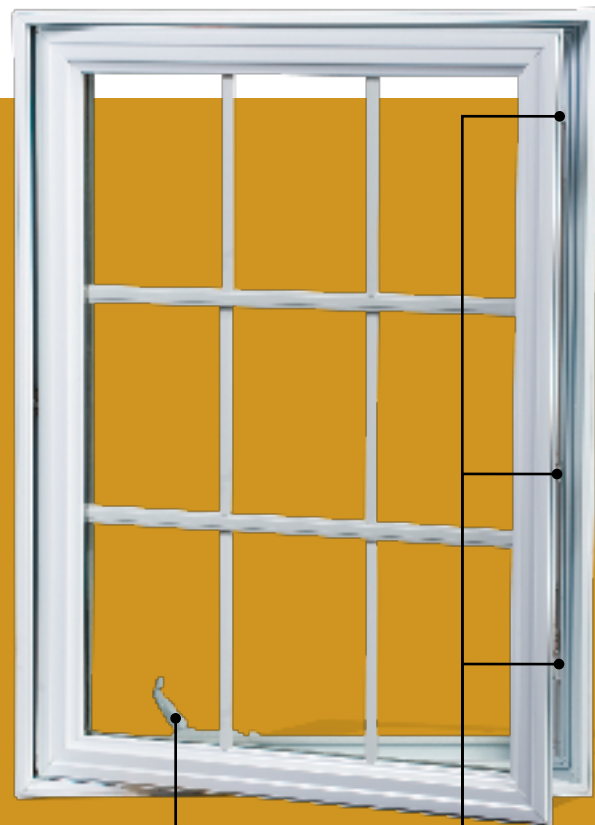

8

Triple weather-stripping
Non visible water seal

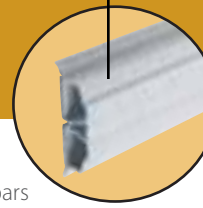

For colour, choose a hybrid window with an aluminum exterior and a PVC interior

Retractable handle

Multipoint locking mechanism

Muntin bars
Design of French inspiration

HUNG Windows

Halo Hung windows add a beautiful finishing touch to English, Victorian, and Canadian style homes. They are available with one or two mobile sashes. As is the case with all our windows, Halo windows are made with superior quality materials for **greater solidity**. Thanks to their integrated handle and spring mechanism, Halo windows are designed to ensure greater **ease of operation**. All Halo windows come equipped with a removable mobile sash which **facilitates maintenance**.

Double hung window

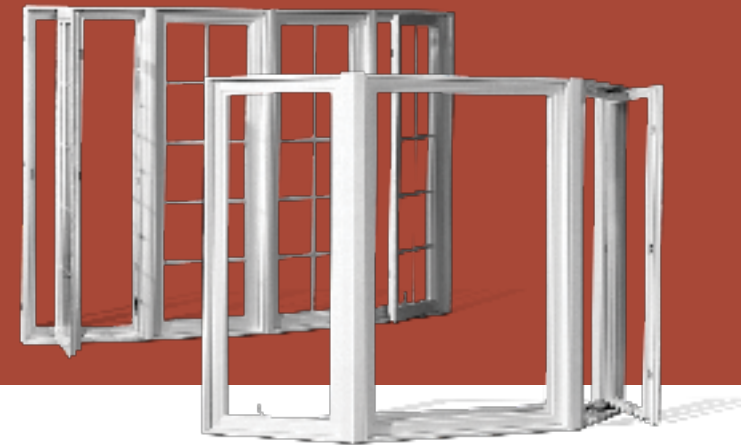

HORIZONTAL Sliding Windows

These horizontal sliding windows have the high-end appearance of casement windows but they are **more economical** to purchase. Celeste PVC windows offer **good looks, durability** and **outstanding performance**. Their exclusive brass roller sliding system greatly facilitates opening the sash and guarantees many years of efficient operation. Celeste windows are designed to perfectly harmonize with Helios casement windows or Halo vertical sliding windows.

BAY Windows

Give your main rooms a **grand new appeal** with arched or bay windows made from PVC, wood, aluminum or even one of our hybrid models. Go ahead, be creative! You can maximize sunshine by combining a fixed glass panel combined with casement sashes or a hung window. Or you could opt for an assembly of multiple flat panel sashes for rooms requiring good ventilation during summer.

AWNING Windows

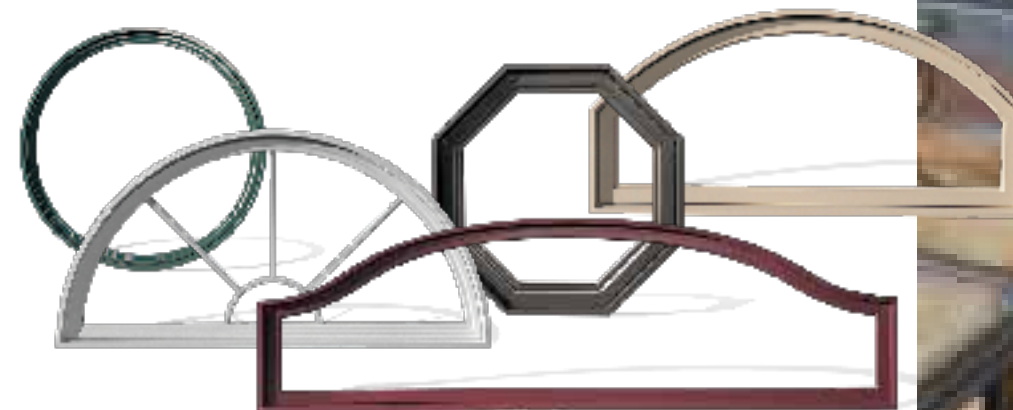

Simple but **effective!** Constellation windows are aptly named because they open towards the sky like an awning, which enables the free circulation of air while protecting the opening against water infiltration. Celeste windows offer added security against intrusions thanks to their **multipoint locking** mechanism activated by a unique lever with a **lifelong warranty**. For greater aesthetics, they also come with a retractable handle.

SPECIAL Shapes

All the windows designed by Vimat Doors & Windows can be **custom made**. Special or totally new shapes are yours for the creating.

Let your dreams be our command.

ETERNA & DYNASTY Patio Doors

Vimat's PVC patio doors with sashes set the standard for all patio doors offered on the market. These doors combine the solidity of wood and the **easy maintenance** of PVC to give you the best of both worlds. Designed with elegance, our patio doors undergo the most demanding tests of the industry for air tightness, water infiltration, wind resistance, ease of use, resistance to break-ins and much more. For the homeowner, this represents: **savings in both heating and air conditioning costs**, easier cleaning, lower maintenance costs and greater comfort: all synonymous of total satisfaction for many years to come.

STANDARD CHARACTERISTICS

- 100% PVC multi-chamber system with double weather-stripping made to withstand our Canadian climate without increasing heating costs
- All profiles are made from unleaded PVC
- Steel reinforcements for increased durability and solidity
- Sliding system, an exclusive concept with two adjustable wheels (1 inch) for smooth and easy operation that resists normal wear and tear
- Durable screen, galvanized steel with anti-insect deflector
- Mechanically assembled ballbearing dovetail joints
- Exterior covering included and interior (optional) in PVC

FIRST IN ECOENERGY

HEATING Patio Doors

COMFORT LIKE NEVER BEFORE

Never again will you feel the discomfort of cold draughts when sitting near your patio door. In addition, heating glass means you won't have to increase the heating near your patio door thereby reducing your energy consumption.

Heating patio doors are very secure since the junction points of mobile and fixed panels are perfectly adjusted making their removal from the outside just about impossible. The glass is tempered and the panel frames include steel reinforcements.

Heating patio doors offer the same characteristics as Dynasty and Eterna patio doors.

13

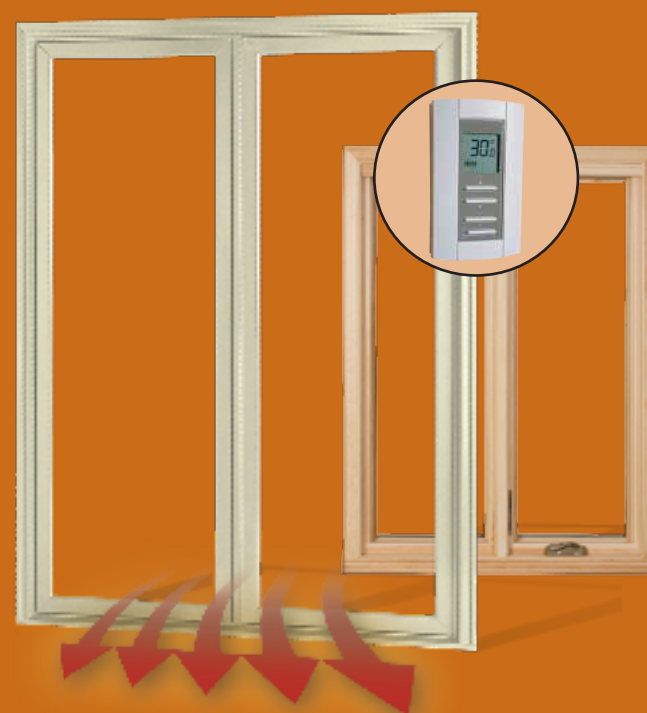

HEATING Glass

COMFORT FOR YOU—RESPECT FOR THE ENVIRONMENT

A pleasant sensation of emanating warmth replaces the cold air ordinarily felt near windows during winter as the heated glass radiates even and comfortable heat. No more need to constantly turn the heat up next to windows or in rooms with large windows, thus reducing your energy consumption even further. And, not having to install baseboard heaters or other heating devices under windows greatly facilitates your room decoration and furniture layout. With heating windows, condensation and frost are a thing of the past, which makes for easy cleaning and hassle-free maintenance. Available in a variety of quality finishes.

Heating windows offer the same characteristics as Helios casement windows.

Options

GRILLES

Vimat offers you a variety of integrated grilles inside the sealed unit for all styles of windows and all architectural applications. Our grilles come in tubular, rectangular or elliptical shape and are available in brass, lead, white or painted finished. Vimat also offers the integrated Devil's Grip colonial grille whose perfectly fitting components ensure an incomparable finish and solidity.

MUNTIN BARS

Another way to confer a particular look to your windows is to opt for sashes with smaller glass surfaces thanks to Muntin bars which are stuck directly on the surface of the glass. This extruded procedure creates unbeatable solidity and incomparable beauty.

FINISHING FRAMES

Finishing frames made by Vimat Doors Windows add a nice touch to any and all window installations. We have a range of models to perfectly match your decor: ready to paint jointed pine, ready to varnish non-jointed pine, MDF, and PVC injected for rounded or irregular shaped windows.

LOW-E AND ARGON GAS

For the most part, a window consists of a glass surface. This is why very close attention must be paid to the choice of glass that enters into the manufacturing of the sealed units of your new windows. A high performance glass – like low emission (Low-E) glass – increases your windows' "R" factor. It slows heat transfer to the outside in winter and does the opposite during summer, thus making your home **more comfortable and less energy demanding**. Talk to your Vimat specialist.

FINISHING MOULDINGS

Our exterior finishing mouldings (brickmould) are offered in a nice selection of models.

PAINT

There are all kinds of tastes in nature... and white is not for everyone. That's why Vimat PVC and hybrid windows are available in an impressive range of colours. We use a specially formulated paint that reflects sun rays and prolongs the life of PVC and aluminum components. All our coloured PVC and hybrid windows also come with a 10 year warranty against peeling and excessive discolouration.

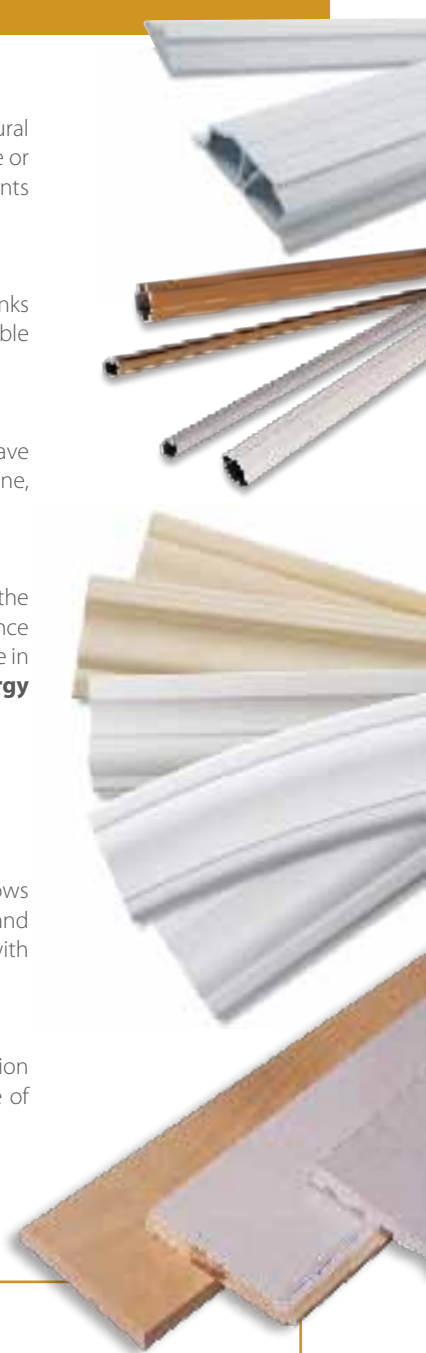

JAMB EXTENSIONS

A perfect finish often requires the addition of a part called a jamb extension to ensure an aesthetic transition between the window frame and the interior or exterior walls. Vimat Doors & Windows makes a full range of jamb extensions designed to harmonize with your present environment.

OUR PVC HYBRID AND WINDOWS COME IN A WIDE RANGE OF COLOURS

C-02	C-06	C-11	C-18	C-22
C-03	C-07	C-12	C-19	C-23

Quality standards

PVC and PVC/aluminum windows made by Vimat Doors & Windows comply with Canadian standards CSA-CAN-A440-00 and CSA-CAN-A440-M90 and achieve the following performance ratings:

Modèle	Air Tightness	Water Tightness	Wind Resistance	Forced Entry Resistance
Helios	A3	B7	C5	F2
Halo	A3	B7	C3	F2
Celeste	A3	B3	C3	F2
Constellation	A3	B7	C5	F2
Amalgame	A3	B7	C5	F2
Minimum standards	A1	B1	C1	F1
Maximum standards	A3	B7	C5	F2

Other products

Vimat also offers other popular types of windows as well as a complete line of doors that will perfectly suit your particular construction or renovation project

- Natural pine windows
- Aluminum covered pine windows
- 100% aluminum windows
- Steel doors, locks
- Garage doors

Ask for our information brochures on our other products or ask your representative.

Warranties

To prove our commitment to **quality** and **durability**, we offer products that **surpass** the industry's highest standards. Our PVC comes with a 20 year warranty, and we offer a 15 year warranty on our thermos products and a lifetime warranty on our hardware. Visit our website for all the details and the applicable conditions of our warranties.
